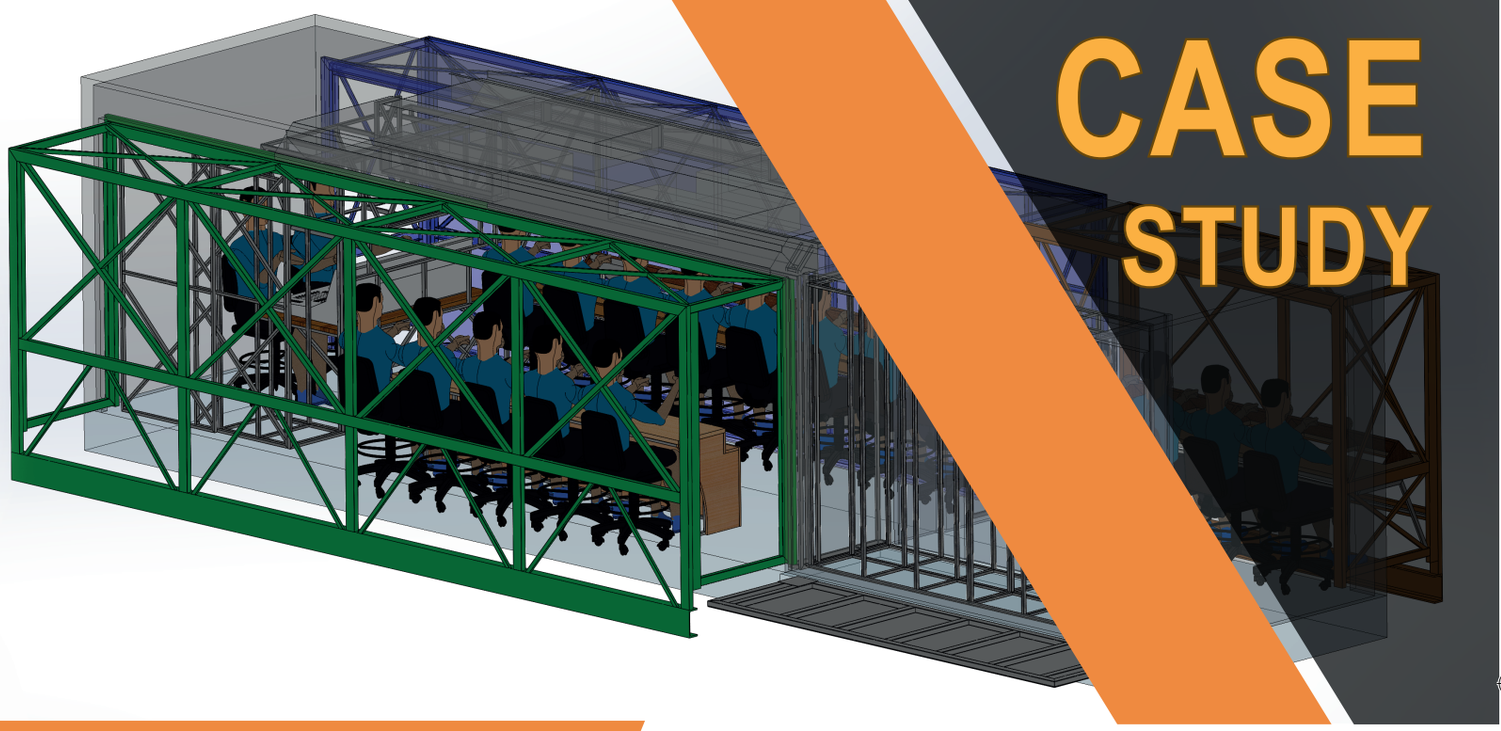
OBVAN REFURBISH



CASE STUDY

NEVER TOO LATE FOR YOUR OBVAN

The very first OBVAN of Show TV has served its owners faithfully over two decades. Then as its technology became irrelevant and its coach started to have mechanical problems it was put for chopping block. That is where we intervened. Together with its new owners, we created a new layout and made any structural changes that was essential to bring life back to this OBVAN.

SRTEK

ORIGINAL DESIGN

- IndeDual expansions on both sides with a small off tube area on the front right.
- Equipment racks located on the very back, providing 168 U usable space
- Two room design seperating Audio and Video
- Airconditioning system below frame providing cooling from underfloor.

NEW DESIGN

- Three room design with seperate Audio, Video and Technical rooms
- Cancelled 4th expansion and integrated the space into new Technical room as Equipment Racks area
- Dual - redundant air-conditioning systems dedicated to operational areas and equipment racks seperately.
- Three entry points into the coach
- Easy Access to the back of the equipment racks
- Rain protected entry on the Technical and Video PCR areas
- All vehicle floor at same height, no step up or down needed
- All lighting system with LED lights f or low consumption
- Power system fully compliant to IEC 60364-7-717
- 5 x 45 RU racks in the Technical Room and additional 1 x 42 RU rack with 2 x 12 RU suspended rack in the Audio Conrol Room.
- All power and lighting cables with silicone jackets-extreme resistance against fire
- All Wall and floor covers are fire retardant materials with anti static and anti bacterial properties
